

MODEL 9450 DOUBLE ACTING DISPENSING SYSTEM

Designed for intermittent/continuous dispensing of two component adhesives, epoxies, urethanes, silicones, and polysulfide.

FEATURES

- Wide range of bore sizes and ratios to satisfy your production requirements.
- Positive displacement piston metering for consistent, accurate delivery of A and B materials. Ratio is assured by honed cylinder diameters.
- Precision Linked Diverter Valves (LDV) eliminate problems caused by problematic check valves.
- Low cycle rate for improved wear.
- Stainless steel, PTFE, cryogenically treated tool steel and hard coated nickel components ensure long lasting performance, even with abrasive materials.
- Manual ("eyeball") or controlled dispensing.
- Mixer manifold isolates materials until they enter the disposable mixer.
- Inexpensive disposable mixing. No solvents.
- Positive pressure supply pumps feed material from tanks or pump fed from 5 gallon pails, 55 gallon drums, or other bulk containers.
