

DIGI-SHOT CARTRIDGE DISPENSER

Economical controlled shot size in a table top package.
Add your cartridge and start dispensing today.

FEATURES

- Either handheld or in a stand
- Includes rotary encoder and a complete electronic control package that allows operator to set very accurate shot size
- Measures volumetric displacement and shuts the valve off when a preset has been reached

SPECIFICATIONS

- Ratios: 1:1, 2:1, 4:1, 10:1 in standard 400, 600 and 750 ml cartridge configurations
- Touch screen HMI display with 20 programmable shot sizes
- Typical Shot range of 1-20 cc

OPTIONS

Precision: Encoded Dispense Delivery allows an operator to digitally set the desired shot size. Multiple accurate shots per cartridge.

Mobility: Bench Mount or Hand Held, all in one unit.

Economical: Performance that is found on higher priced Meter-Mix Systems in a cost-effective package.
