

9450 “**Big Shot**” Double-Acting 2k Metering Solution  
for **Filter End Cap Bonding**

**EXACT**  
DISPENSING SYSTEMS

## Filter End Cap Bonding

### Filter Applications:

End cap bonding. Using a Thermosetting resin to bond filter media to metal or plastic end caps. Also, using a mold to create an elastomeric end cap.

### Centrifugal Molding:

Using centrifugal force to create a media to housing elastomeric seal on cylindrical filters (NIOSH, HEPA).

## 9450 "Big Shot" Double-Acting 2k Metering Solutions

- **Constant 2k flow** with inline Double-Acting Piston Displacement Metering.
- Multiple liter pours benefit from **large 360cc cycles @ .5- 50cc/sec.**
- Many **small 10cc shots** possible from **6" stroke** length.
- Inline fixed ratio cylinder set is ideal to ratio thick with thin combinations.
- Upstream pumps provide pressure, 9450DA assures precise, constant ratio.
