

*Piston and gear pump metering systems for all filter manufacturing applications*

**Extensive Meter/Mix Experience**

- Founded in 1978 – we understand processes and fluids.

**Solid Engineering Expertise**

- Engineered solutions that fit your application requirements.
- We don't sell overpriced machines with unnecessary, high priced features.
- Our machines are known for their rugged dependability and accuracy.

**Superior Customer Service & Technical Support**

- We wet test the material and the production technique with your machine prior to shipment.
- Timely responses both during and after the sale.
- Prompt delivery.
- Excellent training & maintenance offered.

**Ongoing, Ambitious Research & Development**

- We have a solid understanding of the resin processing requirements associated with each application.

*World Class Quality at Competitive Prices*

# EXACT

DISPENSING SYSTEMS

*With over 29 years experience in filtration, EXACT has gained considerable know-ledge in the types of systems most often used in the industry. We have designed and built centrifugal molding systems for use in the production of cylindrical HEPA filters and NIOSH type respirator filters, and have also provided various levels of automation for processing cylindrical end caps.*

#### Meter / Mix Systems for:

- End Cap Molding
- End Cap Sealing
- HEPA Frame Sealing
- Filter Gasketing
- Centrifugal Molding
- Bonding

#### System Features:

- Inline Metering
- Incrematic Dispensing
- Linked Diverter Valving

EXACT & THE FILTER INDUSTRY
