

Ideal for:

- Space & Aerospace
- Medical Devices
- Automotive Composites

PRECISION DISPENSING FOR ADVANCED COMPOSITES

Say Goodbye to Messy Hand Mixing & Inconsistent Results

Our Piston Metering Dispensing Systems eliminate costly errors, material waste, and production delays caused by manual mixing. Whether you need continuous flow or precision shot dispensing, we deliver on-ratio, conditioned materials—every time.

Your Process – Perfected

- **Customized to Spec:** Designed around your material, flow rate, and process
- **Material Conditioning Built-In:** Includes agitation, vacuum degassing, temp control
- **Direct Machine Injection:** Clean, efficient, no transfer mess
- **Fixed Ratio Assurance:** No phasing or temp-based recalibration required
- **Auto-Fill Sensors:** Keep baths full with smart sensors

Engineered Solutions for RTM, VIP, Pultrusion, and Filament Winding

Technical Capabilities

- Variable Temperature Controlled Dispensing, Multi Zone, Accurate Results
- Adjustable Flow Rates, Material-Dependent, call **207-563-2299** to speak to an applications specialist
- Robust, Low-Maintenance Design for Production Environments

Let us help you scale smarter and reduce waste.
